Department of the Interior,

BUREAU OF EDUCATION,

Washington, D. C., Feb 5, 1876.

Dr. John S. Billings.

Dear Sir,

I mentioned to you a few days ago, the Circumstance of my publication of a form for recording wounds, as prepared in 1862, and printed in 1867. The cuts are the same as those used in the Report of the State Medical Society for 1867, with the markings cut out.

Dr. Keene in a letter just received, claims no priority before the date of Copy-right, and had no knowledge of the "Essay," until my letter called his attention to it.

I simply claim priority of idea, so far as to date, although the same thought may have been independently applied.

Very truly yours

Franklin B. Hough, M.D.
